

Fox ESS Stackable Battery

Model: CQ7

CONTENTS

01 Overview Design

From high-strength enclosure
to smart internal systems

02 Effortless Installation

30 Seconds Plug & Play
with error-proof design.

03 360° protection

Prevention-Control-Emergency

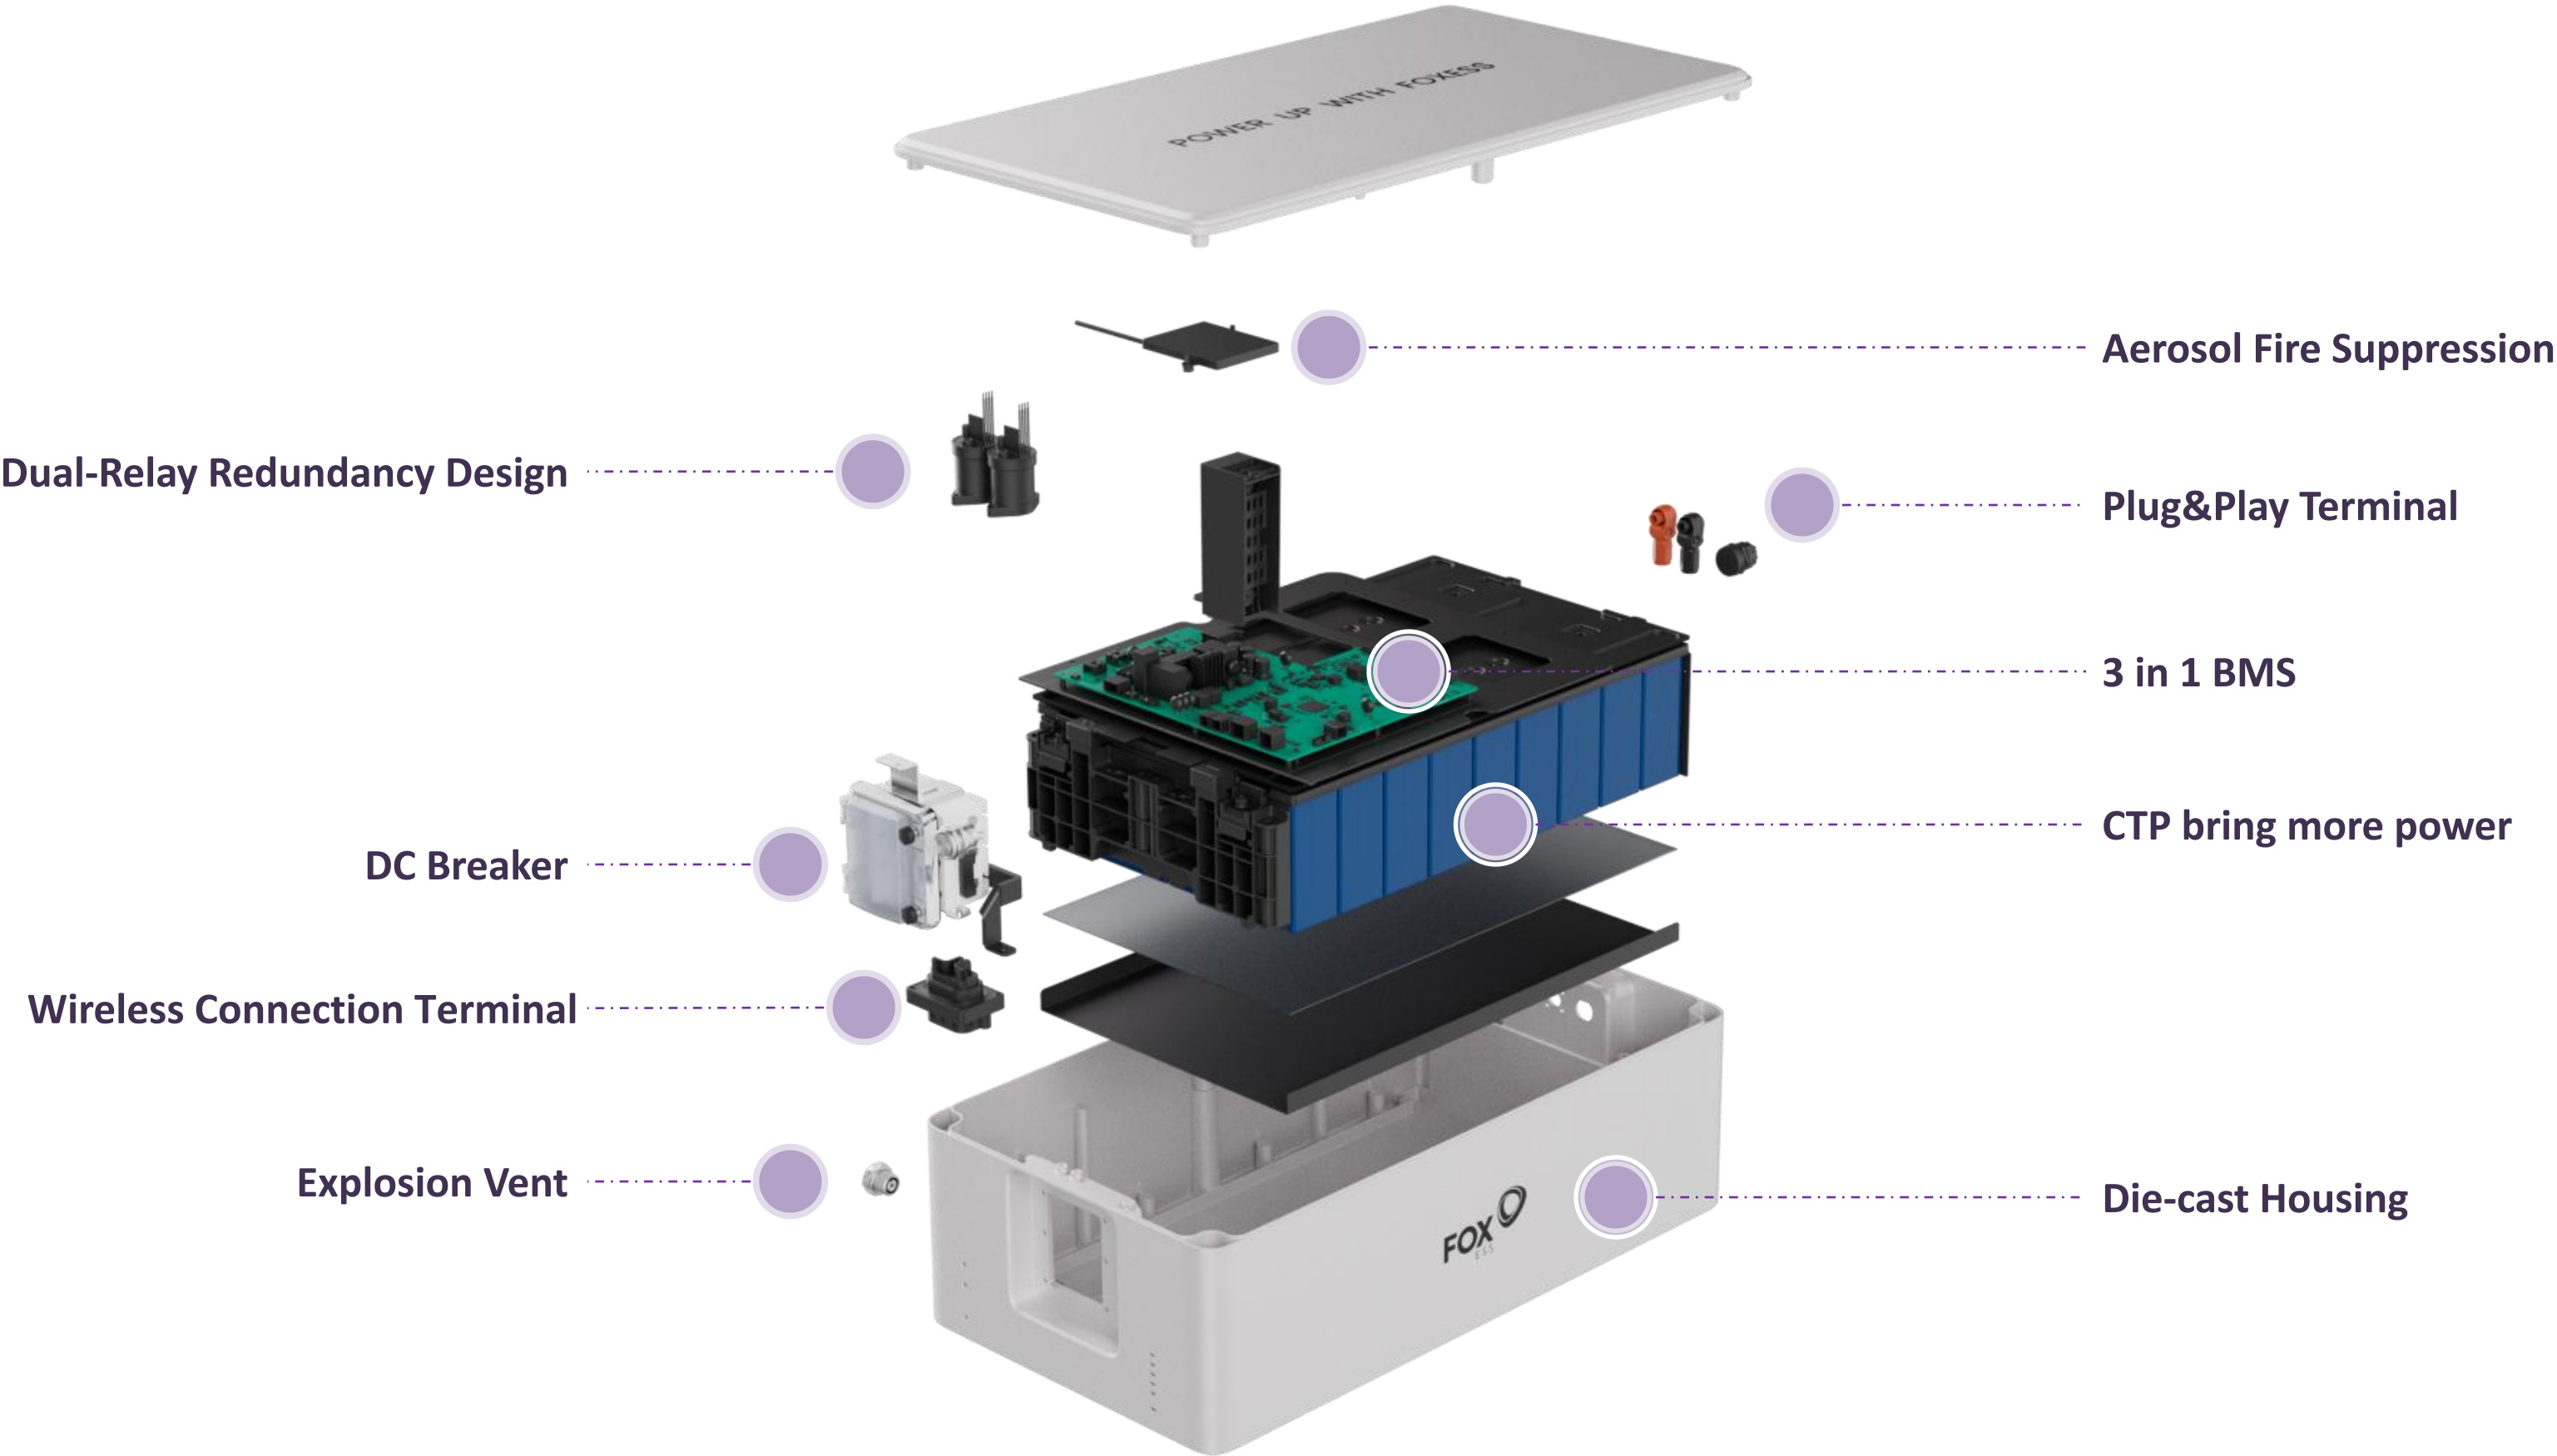

04 Global Certificate

Certified for key
international markets

05 CQ Series

One Series. All Applications.
& Seamless pairing with Fox inverters

Overview-Design

RAPID DEPLOYMENT

Swift Installation, Ready in Minutes

0 Errors. 1 Person. 30 Seconds.

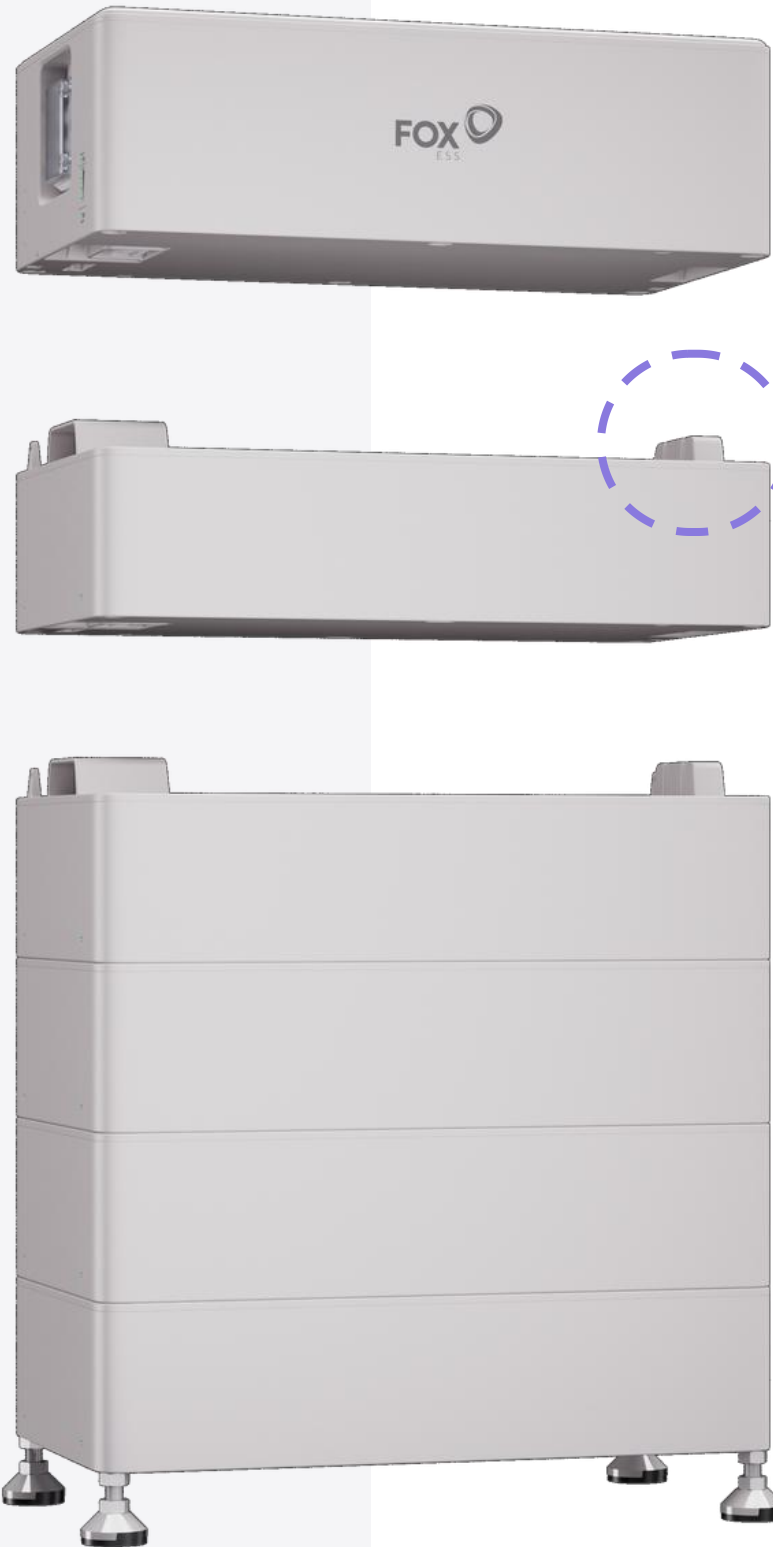

Error-Proof Plug & Play

Hassle-free connection with intuitive stacking design.

Solo Handling (48.8kg)

One person can manage the entire unit alone.

30 Seconds – Rapid Deployment

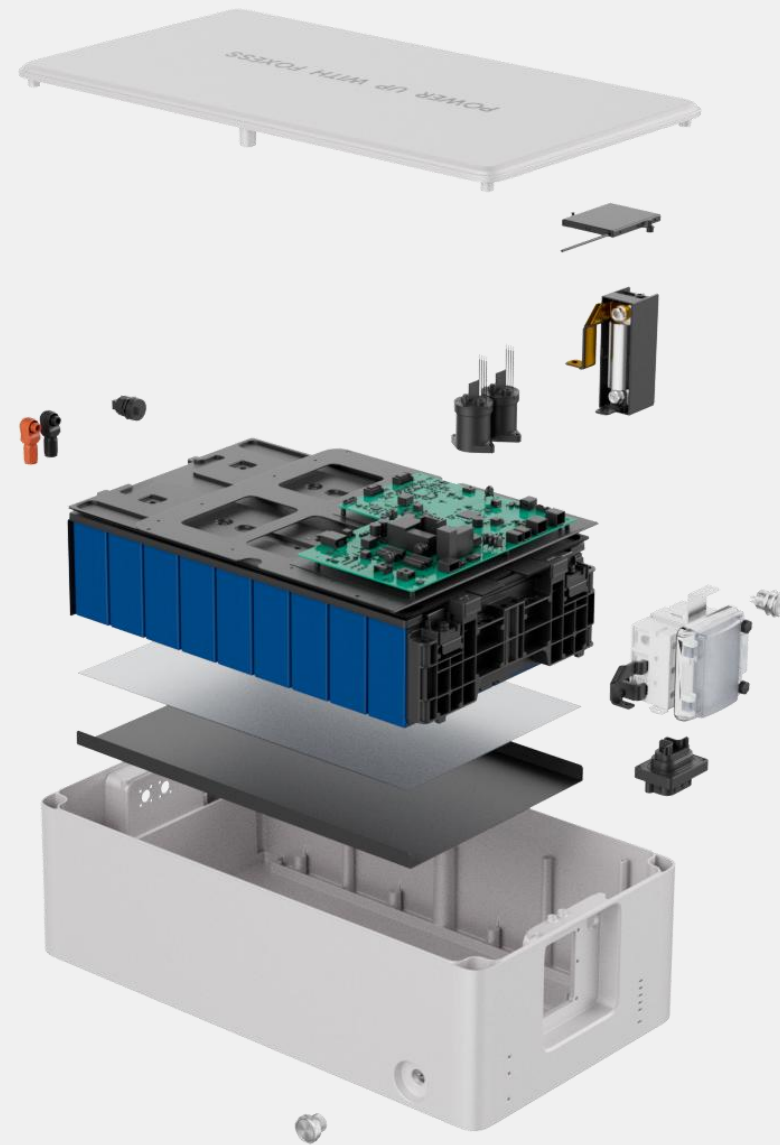

Get your system up and running in half an hour.

360° Protection

5 layers battery protection

1

Full coverage + Real-time temp. detection

2

Aerogel pads between cells

3

Aerosol fire suppression unit

4

Explosion vent

5

High-temp. resistance insulated pads

Comprehensive Protection

Prevention-Control-Emergency

Prevention

- Tier-1 cell and electronic component selection
- AI-driven intelligent control based on big data algorithms
- Automotive-grade chips and automotive-grade system architecture
- Real-time alarm notification and alerting mechanism

Control

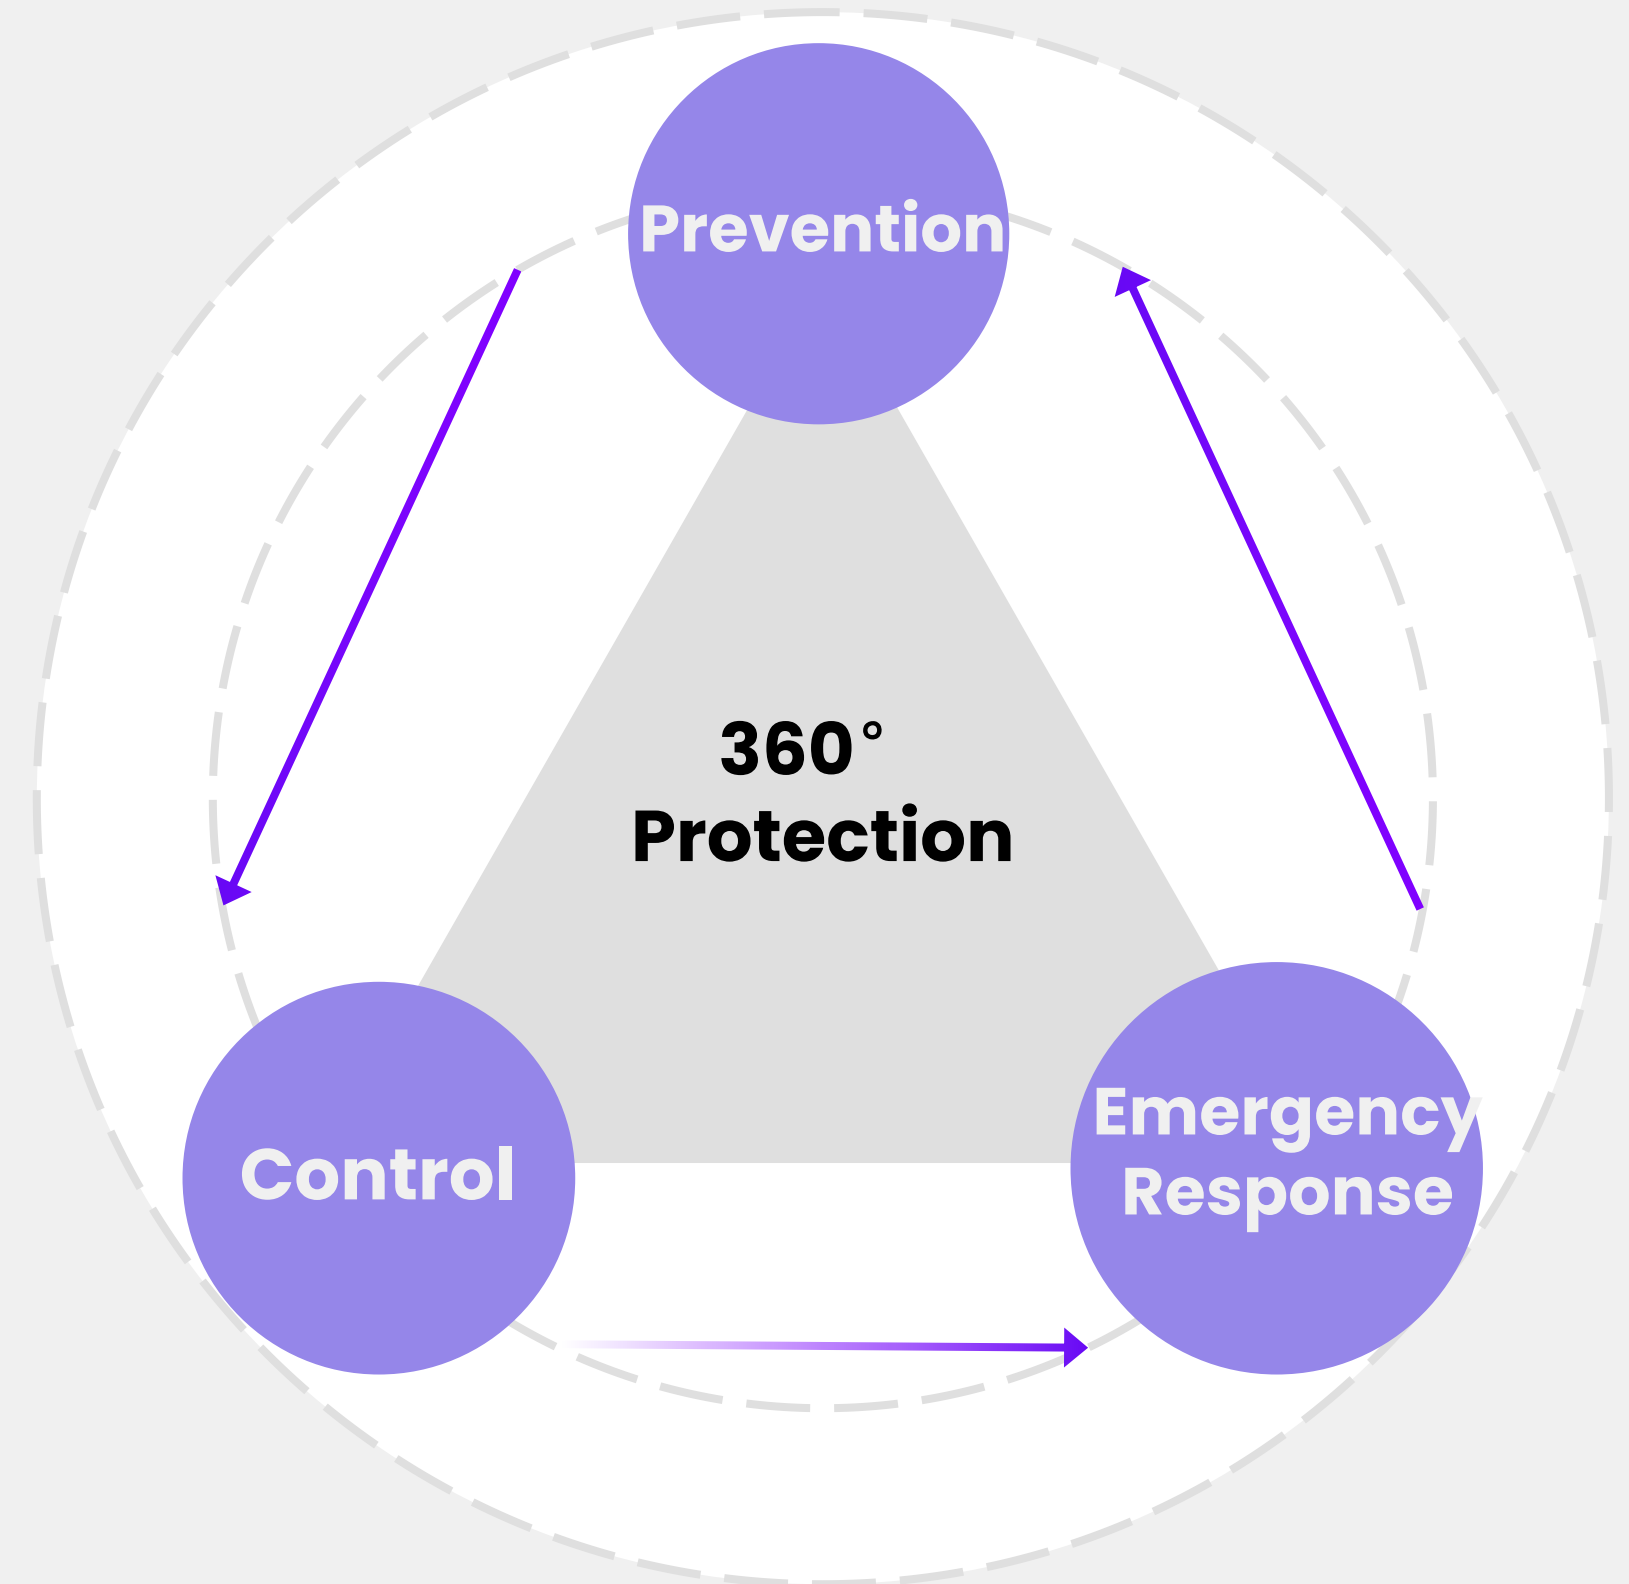

- Millisecond-level software control
- Module-level fuse and relay for physical disconnection
- Dual-relay redundant design
- DC circuit breaker protection

Emergency Response

- Aerogel insulation between cells to prevent thermal propagation
- Module-level aerosol fire suppression for rapid extinguishing
- Module-level pressure relief valves to prevent explosion

Tier-1 Battery Cells

Battery Systems — Built with Tier-1 Cell Suppliers

Powered by REPT LiFePO₄ cells, trusted across global automotive and energy industries.

REPT
LiFePO

4

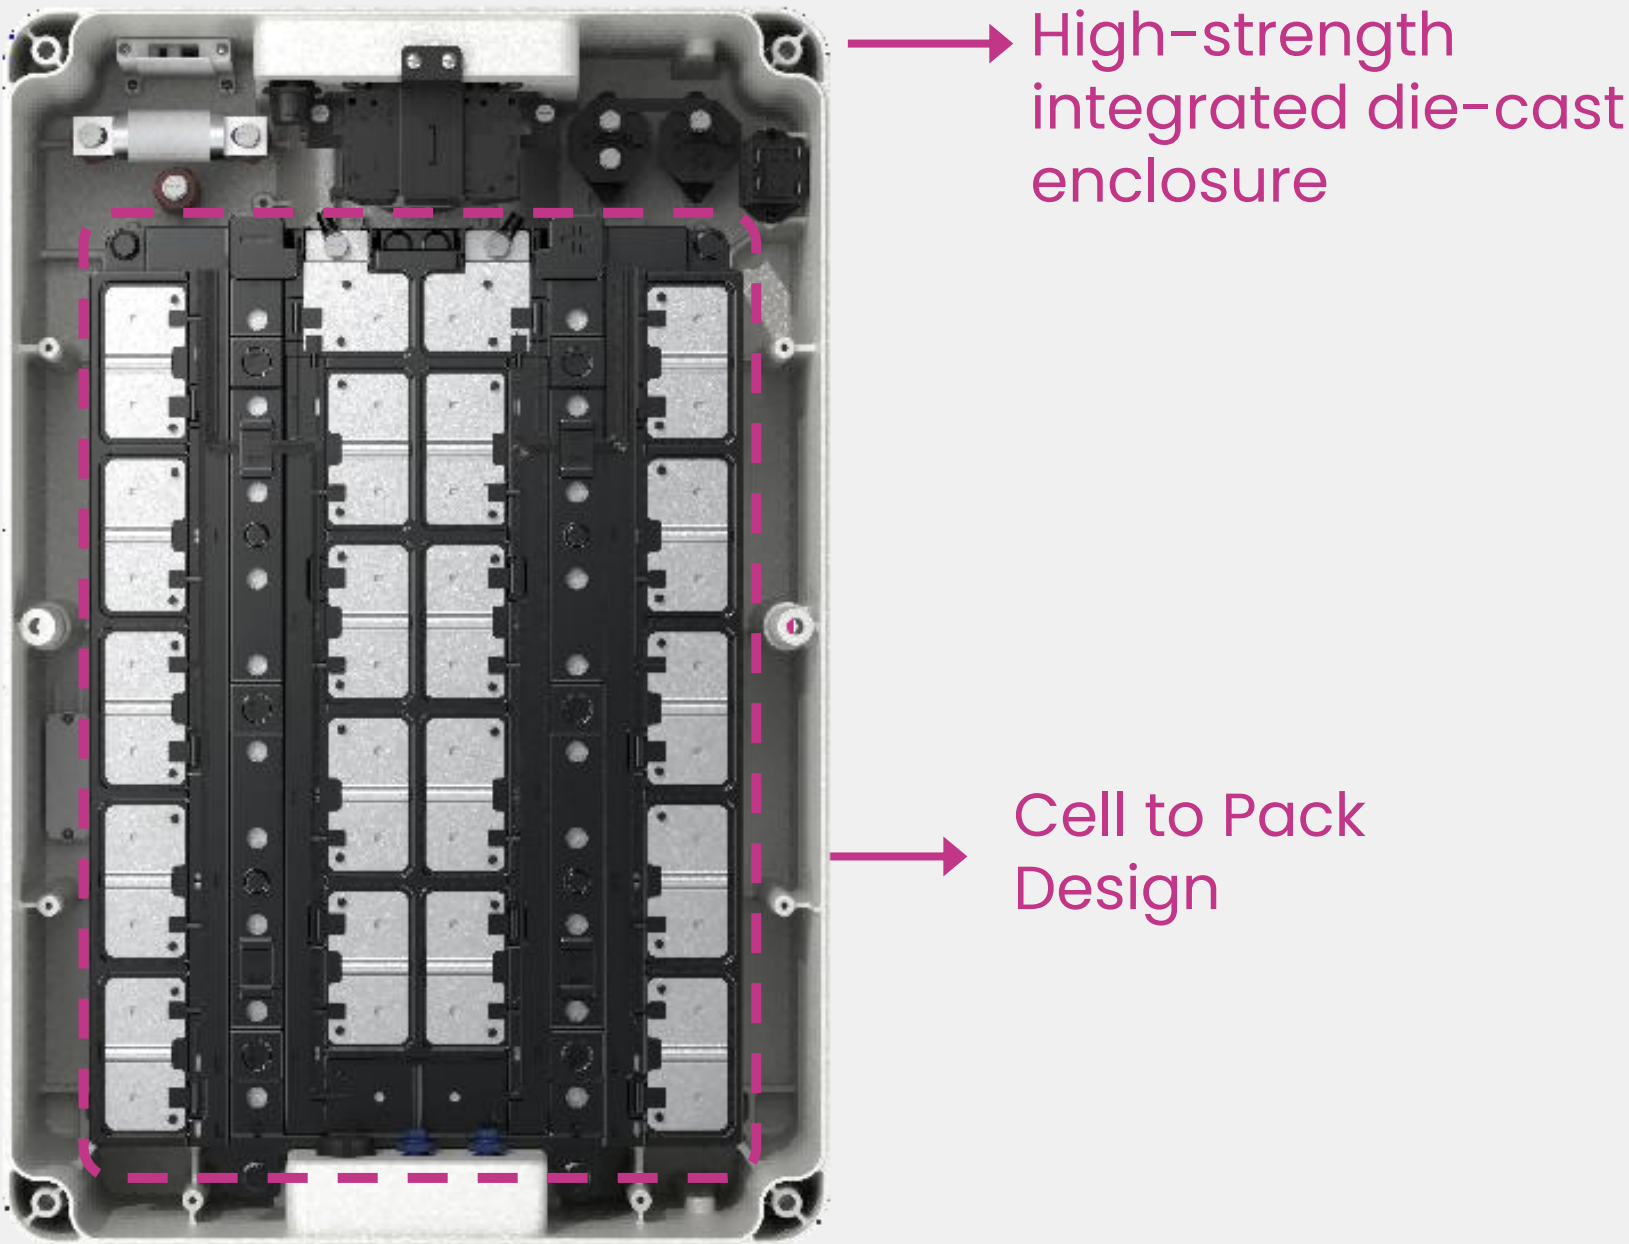

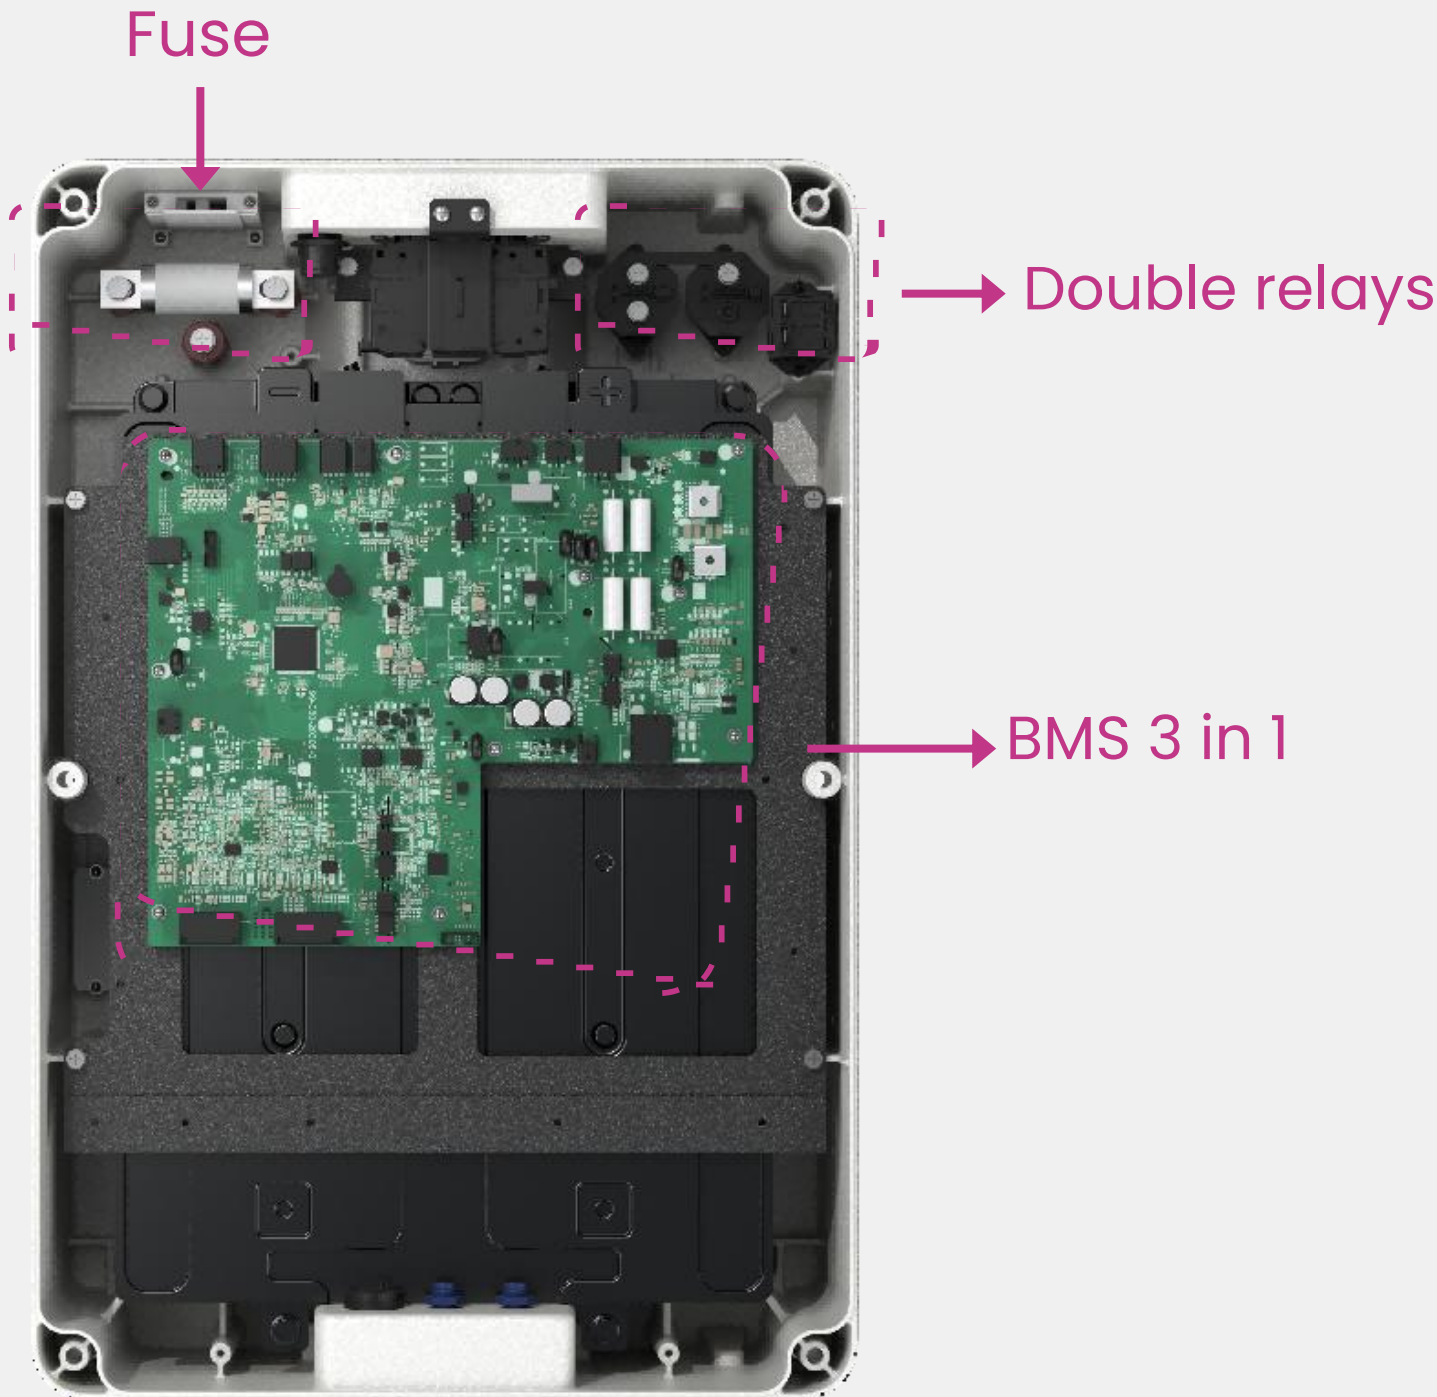

Passed nail penetration, drop, and crush tests, and certified to multiple international safety standards.

Integrated. Secure. Efficient

Battery moduel hardware design

3-in-1 BMS & Die-Cast Shield & Fewer Wires

- **Safety Driven**

Eliminating connection risks via 3-in-1 integration.

- **CTP Optimized**

Reduced wiring, compact size, and superior thermal management.

- **Profit Focused**

Extended MTBF for continuous power and higher financial returns

ULTIMATE SAFETY ASSURANCE

Dual-Layer Module-Level Protection

Smart Fire Suppression + Rapid Pressure Relief: Blocking Risks at the Source.

- **Module-Level Fire Suppression**

Each battery module has its own independent fire suppression module for precise, localized protection.

- **Module-Level Pressure Relief Valve**

Each battery module is equipped with an industry-grade pressure relief valve to enhance safety and reduce damage in fault conditions.

International Compliance

Global Safety Certifications

Certified for key international markets

Complies with the Following International Standards:

IEC 62619:2022 (including thermal runaway propagation)

LVD:

- IEC 62477-1:2022
- EN IEC 62477-1:2023

IEC 62040-1:2017

IEC 62040-1:2017/AMD1:2021

SGS

CE

UN38.3

EMC

Modular Energy Storage CQ7

From 14.02kWh to 98.28kWh

Max.
98.28kWh

7.02kWh/Moduel

A modular stackable design for flexible expansion

CQ7 Series

01

Designed for SEA market
Designed for flexible installation

02

Installation Scenarios

IP65-rated enclosure, suitable for outdoor installation under standard conditions

Compact and Flexible Design

- Vertical stacking minimizes footprint
- Maximize capacity within limited space

Scalability

Flexibly scalable from residential to light commercial applications.

One Series. All Applications.

CQ7 Series

1

Zero Wiring Errors

Ensures error-free installation with
no wiring mistakes.

Quick Installation

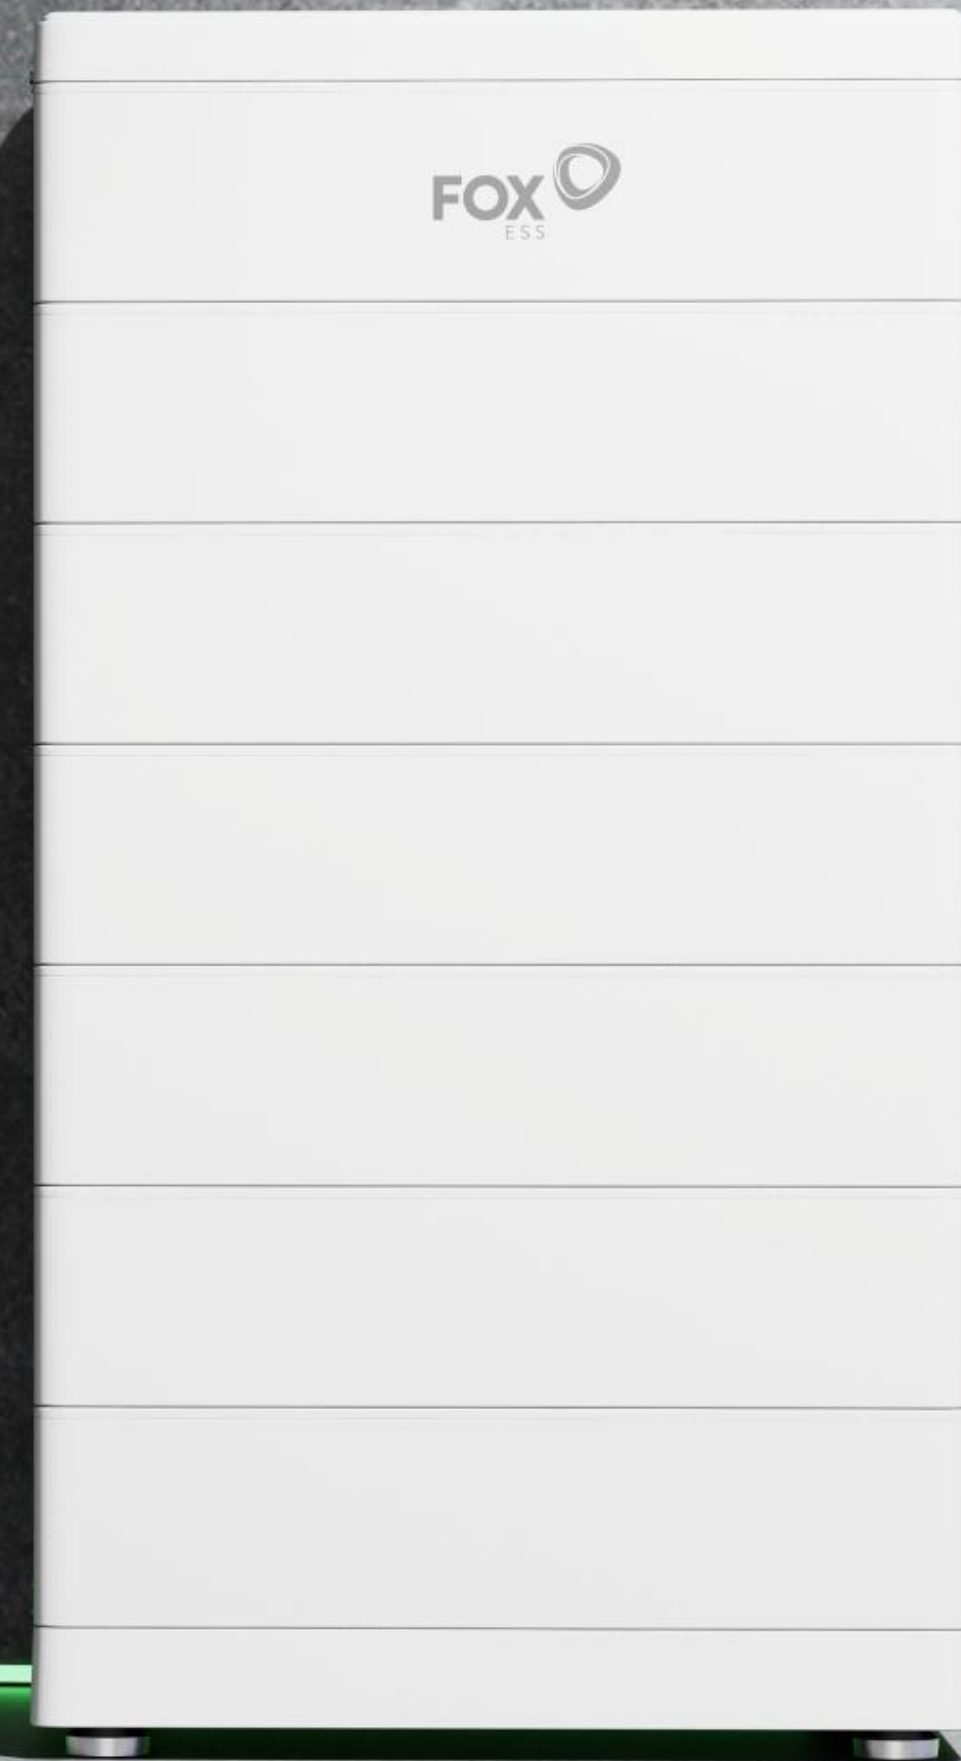

From unpacking to operation in just
30 minutes

2

3

Space-Saving Design

Requires **minimal space** with an
efficient layout design.

One Series. All Applications.
CQ7 Series

Flexible Capacity Expansion

Easily expandable capacity range from
11.98 kWh to 98.28 kWh.

1

2

Less Complexity, Faster Projects

A streamlined product range reduces complexity, **speeds up installation**, and lowers operational overhead.

From Residential to C&I

Seamlessly integrates with Fox ESS inverters across **residential and commercial applications**

3

Grow Your System as Your Needs Grow

CQ Series

Flexible Battery Expansion for Any Scenario

H1 G2 Series
3-6kW
Single-phase

KH Series
7-10.5kW
Single-phase

P3-S Series
5-15kW
Three-phase

P3 Pro Series
15-30kW
Three-phase

P3 Plus Series
50-125kW
Three-phase

From 14.04kWh

→ Max. 98.28kWh/BMS
